INDEPENDENT AUDITOR'S REPORT

To the Village Board Village of Merrillan, Wisconsin

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Village of Merrillan, Wisconsin ("Village"), as of and for the year ended December 31, 2022, and the related notes to the financial statements, which collectively comprise the Village's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Village, as of December 31, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Village, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Village's ability to continue as a going concern for twelve months beyond the financial statement date, including and currently known information that raise substantial doubt shortly thereafter.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Village's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Village's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the budgetary comparison information be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Required Supplementary Information (Continued)

Management has omitted the Management's Discussion and Analysis that governmental accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Village's basic financial statements. The supplementary information as listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements. The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Prior Year Summarized Comparative Information

The prior year summarized comparative information has been derived from the Village's 2021 financial statements and, in our report dated March 24, 2022, we expressed an unqualified opinion on the respective financial statements of the governmental activities, the business-type activities and the major fund.

Reconciliation of the Governmental Funds Balance Sheet with the Statement of Net Position

December 31, 2022

Total fund balances-governmental funds:	-	\$ 11 ⁴	1,106	\$	2021 196,642
Amounts reported for governmental activities in the statement of net position a	are				
different because:					
Capital assets used in governmental funds are not financial resources and					
therefore are not reported in the fund statements. Amounts reported for					
governmental activities in the statement of net position:					
Governmental capital asset	2,320,291				
Governmental accumulated depreciation	(1,307,871)	1,012	2,420		982,274
Long-term liabilities, including bonds payable, are not due and payable in th					
current period and therefore are not reported in the funds statements. Long-	-				
term liabilities reported in the statement of net position that are not reported	d in				
the funds balance sheet are:					
Notes payable	•	(36	5,774)		(41,188)
Total net position of governmental activities	=	\$ 1,089	9,752	\$ 1	,137,728

Reconciliation of Statement of Revenues, Expenditures and Changes in Fund Balance of Governmental Funds to the Statement of Activities For the Year Ended December 31, 2022

(With summarized financial information for the year ended December 31, 2021)

		2022		2021
Net change in fund balances-total governmental funds	\$	(82,536)	_	\$ 46,819
Amounts reported for governmental activities in the statement of activities are different because:				
The acquisition of capital assets are reported in the governmental funds as				
expenditures. However, for governmental activities those costs are shown in				
the statement of net position and allocated over their estimated useful lives as				
annual depreciation expenses in the statement of activities.				
Capital outlay reported in governmental fund statements 103,984				
Depreciation expenses reported in the statement of activities (67,831)	<u>)</u>	_	(71,349)	
Amount by which capital outlays are greater (less) than depreciation				
in the current period.		36,153		(71,349)
The net effect of various miscellaneous transactions involving capital assets				
(i.e. sales, trade-ins, donations, and disposals).		(6,007)		
Repayment of principal on long-term debt is reported in the governmental funds as an expenditure, but is reported as a reduction in long-term debt in the statement of net position and does not affect the statement of activities.				
The amount of long-term debt principal payments in the current year is:		4,414		4,324
Change in net position-governmental activities	\$	(47,976)	=	\$ (20,206)

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Village of Merrillan is located in Jackson County, Wisconsin. The accounting policies of the Village of Merrillan conform to accounting principles generally accepted in the United States of America as applicable to governments. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body establishing governmental accounting and financial reporting principles. Significant accounting policies and principles of the Village of Merrillan are summarized below:

A. Reporting Entity

This report includes all of the funds of the Village of Merrillan, Wisconsin. The reporting entity for the Village consists of (a) the primary government, (b) organizations for which the primary government is financially accountable, and (c) other organizations for which the nature and significance of their relationship with the primary government are such that their exclusion would cause the reporting entity's financial statements to be misleading or incomplete. Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The primary government is financially accountable if it appoints a voting majority of the organization's governing body and (1) it is able to impose its will on that organization or (2) there is a potential for the organization to provide specific financial benefits to or burdens on the primary government. The primary government may be financially accountable if an organization is fiscally dependent on the primary government.

B. Government-Wide and Fund Financial Statements

The statement of net position and statement of activities display information about the reporting government as a whole. They include all funds of the reporting entity except for fiduciary funds. The statements distinguish between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. Likewise, the primary government is reported separately from a legally separate component unit for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. The Village does not allocate indirect expenses to functions in the statement of activities. Program revenues include (1) charges to customers or applicants who purchase, use or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not included among program revenues are reported as general revenues. Internally dedicated resources are reported as general revenues rather than as program revenues.

Fund Financial Statements

Financial statements of the reporting entity are organized into funds each of which is considered to be a separate accounting entity. Each fund is accounted for by providing a separate set of self-balancing accounts, which constitute its assets, liabilities, net position/fund equity, revenues, and expenditure/expenses.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. Government-Wide and Fund Financial Statements (Cont.)

Funds are organized in major funds or non-major funds within the governmental and proprietary statements. An emphasis is placed on major funds within the governmental and proprietary categories. A fund is considered major if it is the primary operating fund of the Village or meets the following criteria:

- a. Total assets and deferred outflows of resources, liabilities and deferred inflows of resources, revenues, or expenditures/expenses of that individual governmental or enterprise fund are at least 10 percent of the corresponding total for all funds of that category or type, and
- b. The same element of the individual governmental fund or enterprise fund that met the 10 percent test is at least 5 percent of the corresponding total for all governmental and enterprise funds combined.
- c. In addition, any other governmental or proprietary fund that the Village believes is particularly important to financial statement users may be reported as a major fund.

The Village reports the following major governmental funds:

General Fund – Accounts for the Village's primary operating activities. It is used to account for all financial resources except those required to be accounted for in another fund.

The Village reports the following major proprietary funds:

Water and Electric Utility – Accounts for operations of the electric and water system. Sewer Utility – Accounts for the operations of the sewer utility.

The Village reports the following non-major governmental fund:

TID #1 Fund – Accounts for the activity of the Tax Incremental District, including any payment of long-term debt principal, interest, and related costs.

Fiduciary Funds (Not included in Government-Wide Statements)

The Village reports the following fiduciary fund:

Fiduciary funds consist of pension (and other employee benefit) trust funds, private-purpose trust funds, investment funds, and custodial funds. Fiduciary funds should be used only to report resources held for individuals, private organizations, or other governments. A fund is presented as a fiduciary fund when all of the following criteria are met: a) The government controls the assets that finance the activity, b) Assets are not generated from the government's own-source revenues or from government-mandated or voluntary nonexchange transactions, c) Assets are administered through a qualifying trust or the government does not have administrative involvement and the assets are not generated from the government's delivery of goods or services to the beneficiaries, or the assets are for the benefit of entities that are not part of the government's reporting entity.

Custodial Funds - used to account for assets held by the Village in a trustee capacity or as an agent for individuals, private organizations, and/or other governmental units. The Village accounts for tax collections payable to overlying taxing jurisdictions in a custodial fund.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Government-Wide Financial Statements

The government-wide statement of net position and statement of activities are reported using the economic resources measurement focus and the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recorded when the liability is incurred or economic asset used. Revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place. Property taxes are recognized as revenues in the year for which they are levied. Taxes receivable for the following year are recorded as receivables and deferred inflow of resources. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider are met. Special assessments are recorded as revenue when earned. Unbilled receivables are recorded as revenues when services are provided.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are charges between the Village's water and sewer utility and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Fund Financial Statements

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recorded when they are both measurable and available. Available means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. For this purpose, the Village considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures are recorded when the related fund liability is incurred, except for unmatured interest on long-term debt, claims, judgments, compensated absences, and pension expenditures, which are recorded as a fund liability when expected to be paid with expendable available financial resources.

Property taxes are recorded in the year levied as receivables and deferred inflows of resources. They are recognized as revenues in the succeeding year when services financed by the levy are being provided.

Intergovernmental aids and grants are recognized as revenues in the period the Village is entitled the resources and the amounts are available. Amounts owed to the Village which are not available are recorded as receivables and deferred inflows of resources. Resources (typically cash) received before all eligibility requirements have been met are reported as assets and offset by unearned revenue (a liability) unless only a time requirement has not been met. In that case, deferred inflows of resources are reported rather than a liability.

Special assessments are recorded as revenues when they become measurable and available as current assets. Annual installments due in future years are reflected as receivables and deferred inflows of resources.

Revenues susceptible to accrual include property taxes, miscellaneous taxes, public charges for services, special assessments and interest. Other general revenues such as fines and forfeitures, inspection fees, recreation fees and miscellaneous revenues are recognized when received in cash or when measurable and available under the criteria described above.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation (Cont.)

The Village reports deferred inflows of resources on its governmental funds balance sheet. For governmental fund financial statements, deferred inflows or resources arise when a potential revenue does not meet both the "measurable" and "available" criteria for recognition in the current period. In subsequent periods, when both revenue recognition criteria are met, the deferred inflow of resources is removed from the balance sheet and revenue is recognized.

Proprietary and fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as described previously in this note.

The proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the electric and water utility and sewer utility are charges to customers for sales and services. Operating expenses for proprietary funds include the cost of sales and services, administration expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Revenues and expenditures arising from non-exchange transactions, such as property and sales taxes, fines, and grants are recorded according to the standards in Governmental Accounting Standards.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

D. Deposits and Investments

All deposits of the Village are made in board designated official depositories and are secured as required by State Statute. The Village may designate, as an official depository, any bank or savings association. Also, the Village may establish time deposit accounts such as NOW and SuperNOW accounts, money market accounts, and certificates of deposit.

For purposes of the statement of cash flows, all cash deposits and highly liquid investments with an original maturity of three months or less (including restricted assets) are considered to be cash equivalents.

Investments with remaining maturities at the time of purchase of one year or less are stated at amortized cost, which approximates fair value. Investments with a maturity of more than one year at acquisition and nonmoney market investments are carried at fair value as determined by quoted market prices.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

E. Receivables

Property taxes are levied in December on the assessed value as of the prior January 1. In addition to property taxes for the Village, taxes are collected for and remitted to the state and county governments as well as the local school district and technical college district. Taxes for all state and local governmental units billed in the current year for the succeeding year are reflected as receivables and due to other taxing units in the accompanying custodial fund balance sheet.

Second installment due	July 31, 2023
Personal property taxes in full	January 31, 2023

Delinquent real estate taxes as of July 31 are paid in full by the county, which assumes the collection thereof. No provision for uncollectible accounts receivable has been made for the Village and the utilities because they have the right by law to place delinquent bills on the tax roll.

During the course of operations, transactions occur between individual funds that may result in amounts owed between funds. Short-term interfund loans are reported as "due to and from other funds," Long-term interfund loans (noncurrent portion) are reported as "advances from and to other funds," Interfund receivables and payables between funds within governmental activities are eliminated in the statement of net position, Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances".

In the governmental fund financial statements, advances to other funds are offset equally by a fund balance reserve account which indicates that they do not constitute expendable available financial resources and, therefore, are not available for appropriation.

F. Inventories

Inventories of governmental fund types consist of expendable supplies held for consumption. Such amounts, which are not material, are considered expenditures when purchased and, accordingly, are not reflected.

Inventories of proprietary fund types are valued at the lower-of-cost or market using the first-in, first-out method and are charged as expenses or are capitalized when used.

G. Restricted Assets

Mandatory segregations of assets are presented as restricted assets. Such segregations are required by bond agreements and other external parties. Current liabilities payable from these restricted assets are so classified. The excess of restricted assets over current liabilities payable from restricted assets will be used first for retirement of related long-term debt. The remainder, if generated from earnings, is shown as restricted net position.

Note 1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

H. Capital Assets

Government-Wide Statements

In the government-wide financial statements, fixed assets are accounted for as capital assets. Capital assets are defined by the government as assets with an initial cost of more than \$5,000 and an estimated useful life in excess of one year. All capital assets are valued at historical cost, or estimated historical cost if actual amounts are unavailable. Donated fixed assets are recorded at their estimated fair value at the date of donation.

Additions to and replacements of capital assets of business-type activities are recorded at original cost, which includes material, labor, overhead, and an allowance for the cost of funds used during construction when significant. The cost of renewals and betterments relating to retirement units is added to plant accounts. The cost of property replaced, retired or otherwise disposed of, is deducted from plant accounts and, generally, together with removal costs less salvage, is charged to accumulated depreciation.

Depreciation of all exhaustible fixed assets is recorded as an allocated expense in the statement of activities, with accumulated depreciation reflected in the statement of net position. Depreciation is provided over the assets' estimated useful lives using the straight-line method of depreciation. The range of estimated useful lives by type of asset is as follows:

	Y ears
Buildings	50
Machinery and Equipment	5
Infrastructure	25
Vehicles	10-20

Fund Financial Statements

In the fund financial statements, fixed assets used in governmental fund operations are accounted for as capital outlay expenditures of the governmental fund upon acquisition. Fixed assets used in proprietary fund operations are accounted for the same way as in the government-wide statements.

I. Unearned Revenue

The Village reports unearned revenue on its governmental fund balance sheet. Unearned revenue arises when resources are received before the Village has a legal claim to them, as when grant monies are received prior to the incurrence of qualifying expenditures. In subsequent periods, when the Village has a legal claim to the resources, the unearned revenue is removed from the balance sheet and revenue is recognized.

J. Compensated Absences

Employees are granted vacation in varying amounts based on length of service. Vacation pay at year-end is not material to these financial statements. Sick leave hours are accumulated by employees for subsequent use. Employees earn ten days of sick leave per year of service. No sick leave can be carried over from year to year. Sick leave does not vest to employees. Actual expenditures are recorded at the time the benefits are used by the employee, and will be paid at the rate of pay then in effect.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

K. Claims and Judgments

Claims and judgments are recorded as liabilities if all the conditions of Governmental Accounting Standards Board pronouncements are met. Claims and judgments that would normally be liquidated with expendable available financial resources are recorded during the year as expenditures in the governmental funds. If they are not to be liquidated with expendable available financial resources, no liability is recognized in the governmental fund statements. The related expenditure is recognized when the liability is liquidated. Claims and judgments are recorded in the government-wide statements and proprietary funds as expenses when the related liabilities are incurred. There were no significant claims or judgments at year-end.

L. Long-Term Obligations

All long-term obligations to be repaid from governmental and business-type resources are reported as liabilities in the government-wide statements. The long-term obligations consist primarily of notes and bonds payable, and accrued compensated absences.

Long-term obligations for governmental funds are not reported as liabilities in the fund financial statements. The face value of debts (plus any premiums) are reported as other financing sources and payments of principal and interest are reported as expenditures. The accounting in proprietary funds is the same as it is in the government-wide statements.

M. Equity Classifications

Government-Wide Statements

Equity is classified as net position and displayed in three components:

- a. Net investment in capital assets Consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets. If there are significant unspent related debt proceeds at year-end, the portion of the debt attributable to the unspent proceeds are not included in the calculation of net investment in capital assets.
- b. Restricted net position Consists of net position with constraints placed on their use either by 1) external groups such as creditors, grantors, contributors, or laws or regulations of other governments or, 2) law through constitutional provisions or enabling legislation.
- c. Unrestricted net position All other net position that does not meet the definition of "restricted" or "net investment in capital assets."

When both restricted and unrestricted resources are available for use, it is the Village's policy to use restricted resources first, then unrestricted resources as they are needed.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

M. Equity Classifications (Cont.)

Fund Statements

The following classifications describe the relative strength of the spending constraints placed on the purposes for which resources can be used:

- Non-Spendable includes amounts that are not in a spendable form (such as inventory) or are required to be maintained intact.
- Restricted includes amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government) through constitutional provisions, or by enabling legislation.
- Committed includes amounts constrained to specific purposes by a government itself, using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint.
- Assigned includes amounts a government intends to use for a specific purpose; intent can be expressed by the governing body or by an official or body to which the governing body delegates the authority. All remaining positive spendable amounts in governmental funds, other than the general fund, that are neither restricted nor committed may be assigned. Assignments may take place after the end of the reporting period.
- Unassigned includes residual positive fund balance within the general fund which has not been classified
 within the other above mentioned categories. Unassigned fund balance may also include negative
 balances for any governmental fund if expenditures exceed amounts restricted, committed, or nonspendable.

The Board may, from time to time, commit additional amounts of fund balance to a specific purpose. Such action shall be taken in open meeting and require the approval of a majority of the Board. Commitments of fund balance, once made, can be modified only by majority vote of the Board.

The Board has adopted a financial standard to maintain a general fund balance equal to 15% of annual general fund expenditures. In the event that the balance drops below the established minimum level, the Village Board will develop a plan to replenish the fund balance to the established level in two years. As of December 31, 2022 the general fund balance was 14% of the 2022 general fund expenditures.

When an expenditure is incurred for purposes for which both restricted and unrestricted (committed, assigned, or unassigned) amounts are available, it shall be the policy of the Village to consider restricted amounts to have been reduced first. When an expenditure is incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used, it shall be the policy of the Village that committed amounts would be reduced first, followed by assigned amounts and then unassigned amounts.

N. Transfers

Transfers include the payment in lieu of taxes from the water and sewer utility to the general fund.

O. Income Tax

Municipal utilities are exempt from income taxes and therefore no income tax liability is recorded by the Merrillan Utilities.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

P. Risk Management

The Village is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omission; injuries to employees; and natural disasters. The Village maintains commercial insurance coverage covering each of those risks of loss. Management believes such coverage is sufficient to preclude any significant uninsured losses to the Village. Settled claims have not exceeded this commercial coverage in any of the past three fiscal years.

Q. Encumbrances

Encumbrances outstanding represent the estimated amount of expenditures ultimately to result if unperformed contracts and open purchase orders at year-end are fulfilled. Encumbrances outstanding at year-end are reported as reservations of fund balance and do not represent liabilities or expenditures. Encumbrances accounting applies only to governmental fund types. The Village does not use encumbrance accounting.

R. Allowance for Uncollectible Accounts

No allowance for uncollectible accounts has been reflected in the government financial statements. Delinquent real estate taxes of the Village are paid in full by the County, which assumes the responsibility for collection. In addition, delinquent user charges are placed on the tax roll if not collected.

S. Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

T. Summarized Comparative Information

The basic financial statements include certain prior-year summarized comparative information in total, but not at the level of detail for a presentation in conformity with accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with the government's financial statements for the year ended December 31, 2021, from which the summarized information was derived.

NOTE 2 EXPLANATION OF CERTAIN DIFFERENCES BETWEEN GOVERNMENTAL FUND STATEMENTS AND GOVERNMENT-WIDE STATEMENTS

Explanation of Differences between Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances and the Statement of Activities

Differences between the governmental funds statement of revenues, expenditures and changes in fund balance and the statement of activities fall into one of three broad categories.

- a. Long-term revenue differences arise because governmental funds report revenues only when they are considered "available", whereas the statement of activities reports revenues when earned. Differences in long-term expenses arise because governmental funds report on a modified accrual basis whereas the accrual basis of accounting is used on the statement of activities.
- b. Capital related differences include (1) the difference between proceeds for the sale of capital assets reported on governmental fund statements and the gain or loss on the sale of assets as reported on the statement of activities, and (2) the difference between recording an expenditure for the purchase of capital items in the governmental fund statements, and capitalization and recording depreciation expense on those items as recorded in the statement of activities.
- c. Long-term debt transaction differences occur because long-term debt proceeds are recorded as revenue and both interest and principal payments are recorded as expenditures in the governmental fund statements. In the statement of activities, long-term debt proceeds are recorded as a liability, interest expense is recorded as incurred, and principal payments are recorded as a reduction of liabilities.

NOTE 3 <u>CASH AND INVESTMENTS</u>

At December 31, 2022, cash and investments included the following:

Petty Cash	\$ 250
Deposits with financial institutions	781,968
Total cash and investments	\$ 782,218

Cash and investments as of December 31, 2022, are classified in the accompanying financial statements as follows:

Exhibit A-1:	
Cash and investments	\$ 427,381
Cash and investments - restricted	274,609
Exhibit A-10:	
Cash and investments	80,228
Total cash and investments	\$ 782,218

Note 3

CASH AND INVESTMENTS (CONTINUED)

Investments Authorized by Wisconsin State Statutes

Investment of Village funds is restricted by state statutes. Available investments are limited to:

- Time deposits in any credit union, bank, savings bank, trust company or savings and loan association.
- Bonds or securities of any county, city, drainage district, technical college district, village, town, or school district of the state.
- Bonds or securities issued or guaranteed by the federal government.
- The local government investment pool.
- Any security maturing in seven years or less and having the highest or second highest rating category of a nationally recognized rating agency.
- Securities of an open-end management investment company or investment trust, subject to various conditions and investment options.
- Repurchase agreements with public depositories, with certain conditions.
- Bonds issued by a local exposition district.
- Bonds issued by a local professional baseball park district.
- Bonds issued by the University of Wisconsin Hospital and Clinics Authority.
- Bonds issued by a local football stadium district.
- Bonds issued by a local arts district.
- Bonds issued by the Wisconsin Aerospace Authority.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates.

The Village's policy does not limit investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Information about the sensitivity of the fair values of the Village's investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Village's investments by maturity:

		Remaining Maturity
Investment Type	Amount	12 months or less
Certificates of deposit	\$ 125,996	125,996

Note 3

CASH AND INVESTMENTS (CONTINUED)

Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. State law limits investments in commercial paper, corporate bonds and mutual bond funds to the top two ratings issued by nationally recognized statistical rating organizations. The Village has chosen to limit its allowable investments to these instruments:

- 1. Certificates of Deposit Village funds may be invested in certificates of deposit maturing within one (1) year or less from the date of investment issued by any banks, savings and loan associations or credit unions which are authorized to transact business in the State of Wisconsin. The financial institutions must have been designated as a public depository of the Village by resolution or ordinance of the Village Board.
- 2. Government Bonds and Securities Village funds may be invested in United States government bonds or securities which are direct obligations of or guaranteed as to principal and interest by the federal government; and, bonds or securities which are obligations of any agency, commission, board or other instrumentality of the federal government, where principal and interest are guaranteed by the federal government. The securities must be purchased through financial institutions authorized to conduct business in the State of Wisconsin and placed in safekeeping in a segregated account in the Village's name at any designated public depository or approved financial institution.
- 3. Government Investment Pool Village funds may be invested in the Wisconsin Local Government Pool Investment Fund without restriction as to the amount of deposit or collateralization.
- 4. Repurchase Agreements Village funds may be invested in repurchase agreements, in financial institutions authorized to conduct business in the State of Wisconsin. Repurchase agreements can only be made in securities which are direct obligations of or guaranteed as to principal and interest by the federal government; and, securities which are obligations of an agency, commission, board or other instrumentality of the federal government, where principal and interest are guaranteed by the federal government. Securities purchased by a repurchase agreement must be placed in safekeeping in a segregated account in the Village's name at any designated public depository or approved financial institution.
- 5. Savings Deposit Village funds may be temporarily invested in savings deposits.
- 6. Securities The Village Clerk-Treasurer may invest in private securities which are senior to, or on a parity with, a security of the same issuer which is rated highest or second highest by Moody's Investors Service, Standard & Poor's Corporation or other similar nationally recognized rating agency.

NOTE 3

CASH AND INVESTMENTS (CONTINUED)

Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the Village would not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial risk for investments is the risk that, in the event of failure of the counterparty (e.g. broker-dealer) to a transaction, the Village would not be able to recover the value of its investment of collateral securities that are in possession of another party. The Village's policy for custodial credit risk is as follows:

- 1. Depositories The Village Board shall, by ordinance or resolution, designated one (1) or more public depositories, organized and doing business under the laws of this state or federal law, and located in Wisconsin, in which the Village Clerk-Treasurer shall deposit all public monies received by her/him.
- 2. Limitations The resolution or ordinance designating one (1) or more public depositories shall specify whether the monies shall be maintained in time deposits subject to limitations of Sec. 66.04(2). Wis. Stats., demand deposits or savings deposits, and whether the surety bond or other security shall be required to be furnished under Sec. 34.07, Wis. Stats., by the public depository to secure the repayment of such deposits. Not more than Seven Hundred Fifty Thousand Dollars (\$750,000) shall be deposited in any one (1) public depository, unless specifically authorized by the Village Board.

Deposits in each local and area bank are insured by the FDIC. Time and savings deposits are insured up to \$250,000. Separately, demand deposits are insured up to \$250,000. Bank accounts and the local government investment pool are also insured by the State Deposit Guarantee Fund in the amount of \$400,000. However, due to the relatively small size of the Guarantee Fund in relationship to the total deposits covered and other legal implications, recovery of material principal losses may be significant to individual organizations.

As of December 31, 2022, \$579,811 of Village deposits were insured by FDIC and \$187,668 of the Village's deposits with financial institutions in excess of federal depository insurance limits were exposed to custodial risk as follows:

Uninsured and Uncollateralized	
Time and Savings Deposits	\$ 187,668
8 1	

All of this amount would be insured by the State of Wisconsin Guarantee Fund providing funds are available at the time of any potential loss.

Fluctuating cash flows during the year due to tax collections, receipt of state aids and proceeds from borrowing may have resulted in temporary balances during the year significantly exceeding uninsured amounts at the balance sheet date.

Concentration of Credit Risk

The Village places no limit on the amount the Village may invest in any one issuer.

NOTE 4 RESTRICTED ASSETS

<u>Bond Reserve and Depreciation Accounts</u>: Represent cash and investments restricted in accordance with the revenue bond ordinance.

NOTE 5 DEFERRED INFLOW OF RESOURCES

Governmental funds report deferred inflow of resources in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Property taxes receivable for the subsequent year are not earned and cannot be used to liquidate liabilities of the current period. Governmental funds also defer inflow recognition in connection with resources that have been received, but not yet earned. At December 31, 2022 the various components of deferred inflow of resources reported in the governmental funds was as follows:

Property Tax Levy	\$ 64,219
Omitted Taxes	28
Special Charges	207
Total	\$ 64,454

NOTE 6 <u>Capital Assets</u>

Capital asset activity for the year ended December 31, 2022, was as follows:

		Beginning					Ending
	_	Balance		Additions	Deductions		Balance
Governmental Activities:							
Capital assets not being depreciated:							
Land	\$_	25,891	\$_		\$	\$_	25,891

NOTE 7 <u>LONG-TERM OBLIGATIONS</u>

Long-term obligations activity for the year ended December 31, 2022, was as follows:

		Beginning Balance		Increases	Decreases	Ending Balance	Amounts Due Within One Year
Governmental Activities			-				
General Obligation Debt:							
Direct Borrowings and Direct	\$		\$		\$ \$	\$	
Placements	_	41,188			 (4,414)	36,774	4,674
Total Governmental Activities	_		_				
Long-Term Liabilities	\$_	41,188	\$		\$ (4,414) \$	36,774 \$	4,674
Business – Type Activities							
General Obligation Debt:							
Bonds	\$	125,000	\$		\$ (40,000) \$	85,000 \$	40,000
Direct Borrowings and Direct							
Placements		341,717			(57,890)	283,827	40,193
Total general obligation debt		466,717	_		(97,890)	368,827	80,193
Revenue Debt:							
Direct Borrowings and Direct							
Placements		423,888			(47,283)	376,605	48,901
Total Business-Type Activities			-		 		
Long-Term Liabilities	\$	890,605	\$		\$ (145,173) \$	745,432 \$	129,094

All general obligation notes and bonds payable are backed by the full faith and credit of the Village. Notes and bonds in the governmental funds will be retired by future property tax levies or tax increments. Business-type activities debt is payable by revenues from user fees of those funds or, if the revenues are not sufficient, by future tax levies.

In accordance with Wisconsin Statutes, total general obligation indebtedness of the Village may not exceed five percent of the equalized value of taxable property within the Village's jurisdiction. The debt limit as of December 31, 2022 was \$1,457,185. There was \$405,601 of general obligation debt outstanding at year-end.

The 2004 bond resolutions require for the further protection of bond holders a statutory mortgage lien, created by Section 66.066 of the Wisconsin Statutes, upon the system which is recognized as valid and binding upon the Village.

The sewerage, electric, and water system revenue bonds require that the following:

Debt Service Fund Requirement: The Bond covenants require the utility to establish and maintain a Debt Service Fund Account, deposits to be made monthly equal to one-sixth (1/6) of the next installment of interest coming due on the Prior Bonds, the Bonds and any Parity Bonds then outstanding and an amount equal to one-twelfth (1/12) of the installment of principal of the Prior Bonds, the Bonds and any Parity Bonds coming due during such Bond Year (after giving effect to available amounts in said Fund from accrued interest, any premium or any other source). This requirement was met for the sewer utility and the electric & water utility for the year ended December 31, 2022. The debt service fund requirement for the sewer utility is \$3,485 and the Debt Service Fund Account had a balance of \$37,186 at December 31, 2022. The debt service fund requirement for the electric & water utility is \$1,380 and the Debt Service Fund Account had a balance of \$62,353 at December 31, 2022.

Annual Debt Service Requirement: The Village covenants to establish, charge and collect such lawfully established rates and charges for the services provided by the Sewerage and Water System so that net revenues (i.e. gross revenues less all costs of operation and maintenance, exclusive of debt service, depreciation, or local tax equivalents) will be at least 1.10 times the amount of principal and interest coming due on all outstanding bonds payable from the income and revenues of the Sewerage and Water System each year. This requirement was not met for the sewer utility and was met for the electric & water utility for the year ended December 31, 2022. The net earnings for the sewer utility were \$40,069 or 0.96 times the annual principal and interest amount of \$41,600. The net earnings for the electric & water utility were \$76,015 or 4.62 times the annual principal and interest amount of \$18,116.

In addition, the bond resolutions require segregation of the proceeds of the mortgage revenue bonds and the creation and continual funding of several accounts from operating revenues as described below:

Note 7

LONG-TERM OBLIGATIONS (CONTINUED)

Depreciation Accounts

The bond resolutions require that sufficient income and revenues shall be set-aside in depreciation accounts to be used to restore any deficiencies in the special redemption and reserve accounts. When sufficient for this purpose, money may then be used for additions to and betterments of the system.

The balance in this account at December 31, 2022 was as follows:

	Dep	reciation
Sewer Utility	\$	48,886

NOTE 8 INTERFUND RECEIVABLES/PAYABLES AND TRANSFERS

For the statement of net position, interfund balances which are owed within the governmental activities or business-type activities are netted and eliminated

The following is a schedule of interfund transfers:

Fund Transfer To	Fund Transferred From	Amou	ınt
Government Funds:			
General	Electric & Water utility-tax equivalent	\$ 4	3,710
Proprietary Funds:		-	
General	Electric & Water utility-tax equivalent	\$ 4	3,710

Generally, transfers are used to (1) move revenues from the fund that collects them to the fund that the budget requires to expend them, (2) used unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations and (3) move fund balances whose designated purpose has been removed.

NOTE 9 GOVERNMENTAL FUND BALANCES

Fund balance as of December 31, 2022 includes the following items:

Major Funds:	
General Fund:	
Restricted	
EMS activities	66,329
Fire department	2,016
Cemetery	57,839
Total	\$ 126,184

NOTE 10 GOVERNMENTAL ACTIVITIES NET POSITION

Governmental activities net position reported on the government wide statement of net position at December 31, 2022 includes the following:

Net investment in capital assets:		
Land	\$	25,891
Other capital assets, net of accumulated depreciation		986,529
Less: related long-term debt oustanding		(36,774)
Total net investment in capital assets		975,646
Restricted for:		
EMS activities		66,329
Fire department		2,016
Cemetery		57,839
Total restricted		126,184
Unrestricted		(12,078)
Total governmental activities net position	\$ 1	1,089,752

NOTE 11 NET POSITION – PROPRIETARY FUNDS

The following calculation supports the utility net position net investment in capital assets:

Plant in service	\$ 7,239,479
Accumulated depreciation	(3,391,626)
Sub-total	3,847,853
Less: capital related debt	(745,432)
Total net investment in capital assets	\$ 3,102,421

Portions of net position are reserved and are not available for current expenses as follows:

Enterprise Funds:	
Sewer Utility	
Reserved for Mortgage Revenue Bonds	\$ 85,014
Electric & Water Utility	
Reserved for Mortgage Revenue Bonds	62,016
Total	\$ 147,030

NOTE 12 <u>Tax Levy Limit</u>

Wisconsin Act 32 imposes a limit on the property tax levies for all Wisconsin cities, villages, towns and counties. Under 2011 Wisconsin Act 32, in 2011 and all future years, a municipality is allowed to increase its levy over the amount it levied in the prior year by the percentage increase in equalized value from net new construction or zero percent. All of the exceptions and modifications to levy limits that existed under previous law continue to apply.

In addition, as part of Wisconsin's Act 20 (2013), legislation was passed that further limits future tax levies. If the Village adopts a new fee or a fee increase for covered services (which were partly or wholly funded by property tax levy), the Village must reduce its levy limit in the current year by the amount of the new fee or fee increase, less any previous reductions.

NOTE 13 EFFECT OF NEW ACCOUNTING STANDARDS ON CURRENT PERIOD FINANCIAL STATEMENTS

The Governmental Accounting Standards Board (GASB) has adopted GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*, effective for periods beginning after June 15, 2022. When this becomes effective, application of this standard may restate portions of these financial statements.

NOTE 14 TAX INCREMENTAL FINANCE DISTRICT

The Village of Merrillan, Wisconsin Tax Incremental District No. 1 (TID) was created under the provisions of Wisconsin State Section 66.46. The purpose of that section is to allow a municipality to recover development and improvement costs in a designated area from the property taxes generated on the increased value of the property after the creation date of the District. The tax on the increased value is called a tax increment.

Project costs may be incurred up to five years before the District's mandatory termination date. Statutes allow the municipality to collect tax increments for a maximum of 27 years for blight elimination districts and 20 years for industrial and mixed-use TIDs. An industrial and mixed-use TID has the option to extend the maximum life by 5 years. Project cost uncollected at the dissolution date are absorbed by the municipality.

		Last Date to	Final
		Incur Project	Dissolution
	Creation Date	Costs	Date
District #1	8/14/2018	8/14/2033	8/14/2038

Following is the cumulative status of the TID as of December 31, 2022:

	TID #1					
Revenues		_				
Tax Increment	\$	67,354				
Expenditures						
Capital Expenditures		5,237				
Professional services		16,600				
Total expenditures		21,837				
Amount to be (recovered) through future increments	\$	45,517				
Cash	\$	45,517				
Amount to be recovered through future increments	\$	45,517				
Amount to be recovered through future increments	\$	45,517				

Note 15

SUBSEQUENT EVENTS/COMMITMENTS

Subsequent to December 31, 2022, the Village approved purchasing a new maintenance truck for \$76,239. The new truck will be financed with a note from a local financial institution with a rate of 6.44%. Debt service requirements to maturity are as follows:

		Governmental Activities											
		General Obligation Debt											
		Direct Borrow	Direct Borrowings and Direct Placements										
Years	_	Principal	Interest	Total

Village of Merrillan, Wisconsin Notes to Required Supplementary Information December 31, 2022

Note 1

BUDGET SCHEDULE

Budgetary information is derived from the annual operating budget and is presented using the same basis of accounting for each fund as described in Note 1.C to the financial statements.

The Village budget is adopted in accordance with state law. Budget amounts in the financial statements include appropriations authorized in the original budget resolution and subsequent revisions authorized by the Village board. Such revisions are required by a statutory provision which states that no expenditure can be made from an expired appropriation. The statutes also require publication of these budget revisions. Revisions require a two-thirds vote of the Village Board. Appropriations for the general fund lapse at year end unless specifically carried forward by Board action. Budget comparisons are not required for proprietary funds.

The Village does not utilize encumbrances in its budget process but does take into consideration certain appropriations, which do not lapse on an annual basis.

NOTE 2 EXCESS EXPENDITURES OVER APPROPRIATIONS

The following expenditures exceeded budget appropriations in the general fund for the year ended December 31, 2022:

	Excess				
Expenditure	Exp	enditures			
Public safety	\$	4,027			
Health and human services		81			
Leisure activities		541			
Debt service		11			
Capital outlay		17,529
